FIJI ISLANDS

LAU GROUP & KADAVU

11 NIGHTS LAU & KADAVU DISCOVERY CRUISE

Embark on a voyage of discovery to a part of Fiji rarely seen by tourists - the Lau Islands and Kadavu.

Departing from Port Denarau, Nadi, the first stop is Makogai Island. Once a leper colony, Makogai is now a centre for giant clam and turtle conservation. Next is Lavena on the southern coast of Taveuni where waterfalls empty directly into the sea and you can hike for a freshwater swim. We cruise on to the most northern island of Lau - Wailagilala where we will explore the island, the ruin of an old light house, nesting turtles, snorkel untouched reefs.

From here we cruise to the nearby Qilaqila, known for its pristine waters and mushroom shaped islands. Explore some amazing caves and incredible reefs in aqua lagoons.

Continuing on we pass Lakeba & Moce to Oneata where the village invite us to their Church on the hill. Fulaga is our next stop. This amazing lagoon is too narrow for us to navigate so we launch the small boats off shore and explore its crystal lagoon and amazing corals. We then visit uninhabited Vuaqava and its central lake where you can explore and view turtles, snakes & amazing bird life.

Be welcomed by the villagers on the island of Kabara known for their wood turning and Tongan heritage. Experience a traditional Meke, Sevusevu & lovo quite different from the traditional Fijian.

We head on to horse-shoe shaped Totoya island to visit a local school and meet the children. Next stop is Kadavu, famous for its wildlife and underwater world.

NEW ADVANCED WRECK DIVE "RAIYAWA" AT TIVUA ISLAND

If you can't join one of our Small Ship Cruises but don't want to miss out on the amazing diving that Fiji offers, then take our Day Trip Dive Safari to Tivua Island.

Tivua Island is a coral atoll surrounded by 500 acres of coral reef so offers a variety of dive experiences including the new MV Raiyawa wreck dive.

Raiyawa was built in 1982 in Fiji and was a government vessel deployed in placing and maintaining Navigational marks around Fiji and also used to carry passengers inter-island. In 2014 Raiyawa was decommissioned and extensive work was done to ensure she was safe for diving. Work included opening large swim throughs in her hull and superstructure, as well as removing any hazards to divers such as sharp edges and obstructions. She was extensively cleaned and prepared in line with the environmental guidelines.

Passengers on Captain Cook Cruises Island Day cruise, and M.V. Reef Endeavour Small Ship cruise itineraries will have the option of diving at the "Raiyawa" wreck.
